

## DEFT SCENARIO EVALUATION

	Type		
	I (A&B)	II (C&D)	III (E)
<b>Fish Protection</b>	Moderate to Good (up front actions or rapid phasing as water supply is developed)	Moderate to Good (Phased)	Fair to Moderate (includes other non-salvage related measures)
<b>ESA Assurances</b>	Immediately provides a good level of assurance, or if standards are phased, timing may be affected by ability to develop new water supply if new standards are keyed to water supply.	Requires generation of more water to achieve the same level of assurance as Type I.	Ability to grant assurance dependent on demonstrating effectiveness.
